

Two of the most critical nutrients fruit and vegetable crops need are calcium and boron. Calcium is an essential element for the growth of the roots and development of the fruit. Calcium is difficult to measure in tissue and soil tests but is essential for healthy plants and fruit quality. Sett® is a special combination of highly available calcium with boron for foliar application specifically designed to maintain leaf and fruit cells' structural strength and health.

PRODUCT FEATURES/BENEFITS

- Improves fruit firmness
- Reduces the effects of fruit aging on the tree or vine
- Slows pulp softening during storage
- Helps reduce numerous storage disorders
- Improves fruit retention

ACTIVE INGREDIENTS:

Calcium (Ca)	8.00%
Boron (B)	0.50%

GUARANTEED ANALYSIS

Stoller products are designed to help plants function more efficiently. Stoller products are not replacements for sound agronomy and fertility programs. They work in concert with good farming practices to help the plant realize its true yield potential.

RECOMMENDED FIELD APPLICATIONS

Sett® is formulated for the following highlighted applications

CONTAINER SIZE

2X2.5 gallon container

275 gallon container
