

# THAT® FLOWABLE SULFUR

STOLLERUSA.COM

THAT® Flowable Sulfur is an EPA-registered, flowable sulfur product that controls a broad spectrum of insects and diseases. This liquid flowable formulation provides exceptional coverage in aerial, ground spray or overhead irrigation applications.

## PRODUCT FEATURES/BENEFITS

- Particle size of less than one micron (0.001 mm), with almost 60 times more surface area than typical dusting sulfur
- Adheres to leaf surface in rain conditions and overhead irrigation
- Exceptional coverage and weathering characteristics are just as beneficial in aerial, ground spray or overhead irrigation applications
- Provides essential nutrient benefits. Sulfur is a key nutrient that enables the plant to make protein and utilize nitrogen
- Effective tool in disease resistance management
- Closed system compatible
- Provides sulfur as a nutrient for plant growth
- Helps to control fungus & insects
- Acidifies leaf surfaces
